

# Overview of the e-Learning Portal solution for educational institutions

## About the system

Our solution allows for holding electronic classes and assessments, and enables collaboration between students, coaches and teachers.

e-Learning Portal supports the very latest trends in electronic learning, such as social networks, wikis and blogs, as well as live chat thanks to integration with Microsoft Unified Communications for audio- and videoconferencing.

## Tasks

e-Learning Portal provides the solution for the following tasks for the IT department at a university beginning to use e-learning processes:

- How can the assessment process be automated?
- How can an online environment for teacher-student interaction be created?
- How can an IT system for supporting distance learning be built?

## Functions

The system's features encompass all aspects of the electronic learning process:

- Content
  - creation and editing of learning materials
  - catalog for storing courses and tests
- Organization of the learning process
  - organizational structure support
  - learning groups
  - curriculums
- Learning
  - assessments
  - workspaces
  - communication (wikis, blogs, Microsoft Unified Communications)

- alerts
- Reporting
  - standard reports
  - OLAP cube generation

## Advantages

Your university can benefit from the following advantages by deploying the e-Learning Portal solution:

- reduced expenses for conducting and managing electronic learning
- improved learning quality thanks to the use of new tools in the learning process
- increased transparency in learning process management
- seamless integration with existing information systems
- increased learning management system effectiveness, scalability and fault tolerance

## Client testimonials

"The deployment of the e-Learning Portal solution has allowed us to significantly increase the effectiveness and scalability of our learning management system, taking into account the many branches of the university, which has a total of around 50,000 students."

Aleksei Novikov, dean of IT, Moscow State University for Economics, Statistics and Informatics

"We use the e-Learning Portal platform to develop a solution that makes the distance learning process truly simple and convenient for students, as well as transparent for managers."

Evgeniy Tsarkov, head, Department for Innovative Projects, Eurasian Free Institute

## System requirements

- Windows Server 2003 or 2008
- 2 GB RAM
- Windows SharePoint Services 3.0
